PRODUCT DETAILS:

Product code:

TR-FUSIONPLUS-2602

Fabric:

65% Polyester/ 35% Cotton 270g/m2

Warming up:

100% Polyester 200g/m2

Technologies:

4-WAY STRETCH

FABRIC PROPERTIES:

- The pants are made of polyester/cotton (PES/CO) fabric, with elastic fabric used in areas where greater elasticity is required.
- For greater abrasion resistance, the most worn areas are reinforced with additional stronger fabric.

DETAILS:

- Additional elastic sewn into the sides of the waistband. The waistband can be extended by up to 6 cm.
- Deep inset pockets on both sides of the trousers (in the hip area). The pocket opening is reinforced with additional sturdy fabric.
- Hanging pockets for tools.
- Tool pocket on the right side of the calf area, zippered pocket on the left.
- Cuff details made from stronger fabric.
- There is a special pocket for knee pads so that the knee area matches the height of the knee pad pocket with a two-level bottom.
- Adjustable bottom of the trousers (after unpicking the seam, the trousers can be lengthened by up to 4 cm).

- Two deep pockets on the back.
- Reflective strips on the shins.

IDEAL FOR:

- Indoor and outdoor work where high visibility is not required.
